Certifications

INF.04 Qualification (2026),
INF.03 Qualification (2024)

Cisco CCNA 1 (2025),
Cisco ITE (2024)

Technologie

- Frontend: React, JS/TS, HTML, CSS,
- Backend: Node.js, PHP (Laravel), C#, Python.
- Bazy: SQL (MSSQL, SQLite), Supabase.
- Inne: Git, Figma, Arduino/C++.

Languages

- Polish: Native
- English B2
- German: DSD I PRO Certificate (B1)

Education

IT Technician (2021 – 2026)

Zespół Szkół Komunikacji im. Hipolita
Cegielskiego, Poznań

ABOUT ME

I am a technical school graduate and a certified IT technician who effectively bridges theory and practice. My experience includes commercial system implementations, building Full-stack ecosystems (React/Node.js), and hardware solutions (C++/Arduino).

For the past two years, I have balanced my studies with the role of Band Manager & Leader, which has shaped my project management and leadership skills. In life, as in code, I prioritize discipline and precision – qualities I develop through strength training and playing the piano. I am looking for challenges that will allow me to further grow as a developer.

PROFESSIONAL EXPERIENCE

Commercial Deployment | Koleje Wielkopolskie (07.2025 – 08.2025)

- KW Inwentarz – Design and implementation of an asset tracking system.

Professional Internship | Koleje Wielkopolskie (05.2025)

Commercial Deployment | Hendi Poland (07.2024 – 08.2024)

- Created and optimized an E-learning platform based on WordPress.

Professional Internship | Hendi Poland (05.2024)

PROJECTS (GitHub)

TerraQuest Ecosystem | github.com/TerraQuest

- A comprehensive booking platform (Web + Mobile) with rating and offer systems.
- Stack: React, Node.js, Supabase, Java (Android), SQLite.
- Implemented secure authentication and custom, advanced UI components.

Familiada System | github.com/Familiada

- A distributed game show system integrated with custom-built hardware.
- Stack: JavaScript, C++ (Arduino), Bluetooth Web API.
- High-precision reaction time logic (ms) and wireless LED control.
